

## Most Northerly Radio Station Now Keeps Arctic Circle In Daily Touch With Civilization

The Arctic circle is now in daily touch with civilization, through the medium of the public by the Department of Interior and Department of National Defence, of the most northerly commercial radio station in Canada. This station is located at Akhivik, at the mouth of the Mackenzie River, and lies 130 miles north of Edmonton and 1,200 miles north of the Arctic circle.

The new station, in conjunction with others in the north, will supply a communication service for the Northwest Arctic and the Mackenzie basin, and will undoubtedly, it is stated, prove of great value to the many trading and transportation companies operating in that district. The country, it is pointed out, is very rich in furs, the yearly export running into many hundreds of thousands of dollars. There are also oilfields of rich mineral deposits, but this resource has yet to be developed. The oil wells at Fort Norman, 300 miles south of Akhivik, are already being developed. It is estimated, and fuel oil and gasoline can now be obtained locally practically within the Arctic circle.

The opening of the Akhivik station and the previous opening of the Fort Smith station on Sept. 8, marks the completion of the development work on the western portion of the project in which the Northwest Territories branch is interested. It is also pointed out that the equipment of Akhivik station was lost when the Lady Ladykender, of the Hudson Bay Company fleet, sank off Point Barrow in August, 1923. The completion of the Northwest Territories radio system has, therefore, to be completed in the next eight years. C. G. Tuley, of the Joint City, Kansas, predicted in an address at the 24th annual convention of the Great Northern National Association at Kansas City.

### Going Back To Grain

Predicts U. S. Cattle Lands Will Be Planted In Wheat

Ten million acres of wheat in the northwest, heretofore used for cattle range, will be planted in wheat within the next eight years. C. G. Tuley, of the Joint City, Kansas, predicted in an address at the 24th annual convention of the Great Northern National Association at Kansas City.

Land acquired was shared in the large farm of Northern Texas, South Dakota, Oklahoma, Colorado and Western Kansas if the change to grain from cattle is made within the acreage which he predicts will go into wheat lands have been underlaid, later declared.

"This is the first year the United States has been on a domestic wheat basis," he said, "and it is the first year that the wheat tariff has benefited the farmer."

### No Crop Failures

Stated That There Was Not One Crop Failure In Manitoba

Not one crop failure in the province of Manitoba is the report of the provincial department of agriculture recently received. The reports from the various districts are satisfactory and a generally optimistic tone prevails. Ninety per cent. of the crop in the Red River Valley and as far west as Dodge la Prairie, and other farm work will be in hand. Average per acre from 61 reports received show wheat yielding 19½ bushels; oats, 41 bushels; barley, 23 bushels; flax, 12 bushels; rye, 18½ bushels. These are higher in every class than last averages for the 10 years.

Potatoes promise a good crop. Pumpkins are better than in years. Ploughing is nicely started. Stock is in good condition. The dairy industry is showing increase of better output over last year.

Clock 7000 Year Old

On the Wulu Cultural in London in a clock, constructed from the primitive culture of the primitive tools, some 7000 years ago, but which still is in excellent condition. Borden, during the hour, the clock records the quarters of the moon and on the stroke of the hour a group of medieval figures break into life and whirl round until the last chime dies away.

Earth Has Growing Pains

A tremulous earth shook a young one, explains Prof. Charles W. Brown, geologist of Brown University, Providence. The series of earthquakes in the Atlantic and Pacific seaboard this year are mere evidence of growing pains, he says in Popular Science Monthly. When the earth really gets adjusted and settled in old age, there will be no more quakes.

### Electric Ship Transports Grain

Carries 70,000 Bushels of Barley From Duluth to Montreal

Montreal placed another notch on its electric ship when the Twin Cities, the first electrically driven ship to use the port of Montreal, left after unloading 70,000 bushels of barley.

The Twin Cities, owned by the Minnesota-Atlantic Transit Company, came from Duluth. Her gross tonnage was 3,450 tons and she is capable of carrying 2,300 tons on a four-ton draught.

The boat, which gave the appearance of a dismantled ship, is entirely electrically driven. She is controlled by the wheelhouse. Her engines are the Diesel electric type, and one of the features of the ship, that is she is propelled by twin rudders and twin screws, both of which are controlled from the wheelhouse.

When coming through the canal the mast, funnel and wheelhouse were brought down to gunwale level to permit the boat to pass under the stationary bridge at the canal. The boat was captained by Martin Peterson was in charge of the boat and crew of sixteen, and he stated this was the first trip made to Montreal.

Her speed is ten knots an hour and she requires, he said, on the trip from New York to Montreal, only 24 hours to Detroit and back to New York is three days of fuel.

All of the appliances used are of the electric type. Her galley, for instance, is electrically operated; and she has accommodation for 600 tons of wheat and 200 tons of barley.

She expects to maintain a regular service to this with the sister ship, the Twin Cities, which is the invention of Henry Ponton, of Cleveland, Ohio. Both boats cost in the neighborhood of \$500,000.

### Indian Lookout Used

By Forestry Service

California Rangers Keep Watch In Pine Trees 200 Feet High

An Indian lookout in the form of a venerable pine tree in the vicinity of Lake Arrowhead, Cal., is one of the valuable aids to the United States forestry service. The tree, which is 200 feet high, serves the ranger lookout even as it served Indian scouts in the past. The tree is 200 feet high, serves the ranger lookout even as it served Indian scouts in the past. The tree is 200 feet high, serves the ranger lookout even as it served Indian scouts in the past.

### Canada a Beautiful Country

New Resident of Alberta is Pleased With Its Attractiveness

Visitors and new settlers in Canada are impressed, not only with the opportunities which the country offers, but also with its beauty and attractiveness. One such new resident now living in Alberta writes a Canadian agent as follows: "As you are familiar with this season of the year in Western Canada, I feel it is not too much to say that I am now sure I will not leave this country. This year is very favorable to the settler. The country is a great pleasure and satisfaction to all. I am greatly enjoying it."

Average temperature of the Canadian zone is 79 degrees.

### Captain R. G. Latta

Has been found in South Africa which can run faster than a horse.

### Wheat Belt To Move North

Discovery of "Garnet" Wheat Will Extend Crop Area

It is regarded that the new wheat called the Garnet may push the wheat belt 100 miles farther north. The new wheat is said to be rust resistant, and it has claims advanced for it by H. J. Newman, cereal specialist of the Canadian Government, grow it, it will be a rival of the famous Marquis wheat, now the popular wheat in Canada and among the majority of American wheat growers.

The wheat, which gave the appearance of a dismantled ship, is entirely electrically driven. She is controlled by the wheelhouse. Her engines are the Diesel electric type, and one of the features of the ship, that is she is propelled by twin rudders and twin screws, both of which are controlled from the wheelhouse.

When coming through the canal the mast, funnel and wheelhouse were brought down to gunwale level to permit the boat to pass under the stationary bridge at the canal. The boat was captained by Martin Peterson was in charge of the boat and crew of sixteen, and he stated this was the first trip made to Montreal.

Her speed is ten knots an hour and she requires, he said, on the trip from New York to Montreal, only 24 hours to Detroit and back to New York is three days of fuel.

All of the appliances used are of the electric type. Her galley, for instance, is electrically operated; and she has accommodation for 600 tons of wheat and 200 tons of barley.

She expects to maintain a regular service to this with the sister ship, the Twin Cities, which is the invention of Henry Ponton, of Cleveland, Ohio. Both boats cost in the neighborhood of \$500,000.

### Manitoba Sugar Beets

Plots Grown For Experimental Purposes In Eastern and Southern Part of Province

The analysis of sugar beets grown on experimental plots in Manitoba has commenced and will continue for the next month, according to the secretary of the Manitoba Sugar Company. These beets, grown on a purely experimental basis, have been produced from 200 plots throughout the eastern and southern portions of the province, chiefly in the Red River and Assiniboine valleys. The early wet weather has been a handicap to the beet crop as it delayed maturity and set back the plants in places. It is hoped that the crop is now satisfactory. A few cars will be shipped to Chicago, Manitoba, for commercial trial at the factory there. Arrangements are already being made to increase the acreage considerably for next year, when it is hoped to ship the crop to the factory now under construction at Grand Forks.

### Increased Gold Production

Ontario Holds First Place By a Wide Margin

Gold production in Canada in the last year in 1925 reached a record of 324,043 ounces, worth \$17,084,880, as compared with 70,556 ounces worth \$4,147,474 in the same period last year. Ontario continued to hold a big lead with 70,714 ounces as compared with 67,141 ounces in 1924. Ontario continued to hold a big lead with 70,714 ounces as compared with 67,141 ounces in 1924.

From the Porcupine field the production amounted to 67,486 ounces, or nearly 82 per cent. of the total for Ontario, while Kirkland Lake produced 126,477 ounces, or 18 per cent. British Columbia gold mines yielded 112,444 ounces, worth \$2,214,424. Small amounts were recorded for Yukon, Manitoba, Quebec and Nova Scotia, in the order named.

Canada's copper production in the first half of 1925 amounted to 63,685 tons, worth more particularly, as the industry knows the metal is improving "margin."—Kingston Standard.

A bird, the size of a sparrow, has been found in South Africa which can run faster than a horse.

### Record Grain Loadings

All Records Are Broken at Lake Ports in October

The record for the unloading of grain cars at the port of Port William, Port Arthur, was twice broken in the week ended October 5, first on the 23rd September, when the highest record for unloading of grain was 11,000 tons, and on November 6, 1925, was eclipsed by 61 cars, and on October 22 was beaten by 65 cars. The number of cars unloaded on the latter day was 5,441—5,492 bushels being unloaded.

Establishing what is really a world record for movement of wheat, grain poured into Earl William and Port Arthur wharves at the rate of nearly thirty bushels a second for the whole of the twenty-four hours of October 5th from Canadian Pacific Railway cars. In all 1,761 cars were unloaded during the day and each car carries an average load of 1,200 bushels, representing a total of 2,115,000 bushels.

### Aspirations For Women

A dairy little aspirin designed especially to appeal to feminine health has appeared in the London market. It is being sold for £200 (about \$1,500). It is a one-cent and half-cent manufacturer says "for the women only."

The Royal Air Club of Great Britain has granted flying certificates to seven women.

Most of our common rays are very old, and doubtless "you can't keep a good man down" was coined by the wisest.

## Utilization Of Straw For The Manufacture Of Paper May Mean Much To Western Farmer

### Fitting Unemployed For Overseas Work

Further Outlines of Scheme Promoted by British Government

Further particulars are now available of the scheme promoted by the British Government for providing training for young unemployed men which will be calculated to fit them for farm work. One of the four residential training centres will be at Claxton, near Ipswich, and those accepted will be trained either for farm work in England or overseas. A start will be made with about 1,200 men, of whom 500 will be slated for overseas.

Applicants for training with a view to employment overseas must be: (a) Protestants approved by a representative of the Dominion authority, and must, before entering training, sign an undertaking to remain throughout the course, and as soon as possible thereafter, to proceed to the Dominion concerned. (b) Single men between the ages of 18 and 25. In the case of men who served with the forces during the Great War the upper age limit may be raised to the extent of each service, up to the age of 28. (c) Unemployed men who have had no opportunity of learning a skilled trade. (d) Must not have received a course of instruction in public accountancy or civil engineering from the civil habitations or King's funds.

The precise nature of the course of training for overseas employment will be varied from time to time, but it is intended, generally, to give training in: (a) The handling of horses, including ploughing and care of live stock, elementary repairs to harness (bridling). (b) Simple agriculture (planting). (c) Elementary woodwork, the use of simple wood-working tools such as plane, chisel, saw, cross cut, and other wedges, and billhooks. (d) The erection and repair of wire fencing and wooden buildings, and where necessary, (e) Timber work, and (f) Simple repairs to farm implements.

### An Opportunity For Canada

Farmers Could Work Up Big Chilled Meat Export Trade

More and more it is becoming apparent that Canadian farmers should be turning their attention to the export of chilled meat. The fact is that Canada has the necessary equipment necessary to become the chief export source of beef to Great Britain, in that her cattle can be fed on grain, an advantage which her competitors, Australia and Argentina, cannot possess. Further, that the chilled meat could be delivered in Great Britain in two weeks and thus practically be the same as the British product. The only reason why the industry knows the meat is improving "margin."—Kingston Standard.

tied up with a strike.

It is now getting about to sub-  
scription receiving time. Look at  
the Review label and how you stand.

The postal department announces  
that Christmas mail for Great Britain  
closes on December 14th.

You can always get a nice assort-  
ment of wedding stationery, cards,  
etc., at the Review office.

Owing to the illness of Premier  
Browne no decision regarding the  
provincial holidays has yet been  
reached.

The Review has a nice assortment  
of cards suitable for personal Xmas  
greeting cards. Leave your orders  
early and avoid the last minute rush.

Don't miss the debate and enter-  
tainment in the Casino theatre next  
Wednesday, Dec. 8th. The Buff de-  
baters will be here to meet Redcliff.

In the four provincial by-elections  
in Quebec three Liberals and one  
Conservative were elected. The Con-  
servative win in Argenteuil was a  
rain for that party.

Medicine Hat municipal elections  
are not creating the usual excitement  
this year according to the News.  
Margo Huchville is again in the field.  
B. Mitchell is his opponent.

The Ladies' Aid of the Brethren  
Church will hold a sale of Children's  
clothing, fancy work, useful articles  
and home cooking, on Saturday Dec.  
12. Tea served from 3 to 6.

Since the debate last Thursday the  
Review has moved from Third to  
Second Street. However, we are still  
in the old stand. We have just re-  
ceived the number of the star.

Dr. Patterson moved to Medicine  
Hat this week. He will, however,  
continue regular office hours at his  
office here. There will be from 8:30  
to 7 every evening.

At the international livestock ex-  
position in Chicago, the "Prince of  
Wales" bull, "King of Princes," won  
the grand championship. "The Prince"  
is always in the limelight and he  
isn't falling off his horse his bull is  
winning prizes at all the fairs.

Those who have articles for sale,  
or have lost anything, find that the  
columns of the Review are the only  
way to reach the public. During the  
past few weeks this has been very  
noticeable, as advertisers have met  
with most satisfactory success.

A fine three story brick cake is  
on exhibition at P. Campeau & Son's  
store these days. We can't tell just  
yet who the bride is but we do get  
that she knows where to go to get  
a real cake made. She believes in  
patronizing home industry and as a  
result has one of the nice cakes it  
is possible to get. Mr. Plingle had a  
local baker, was the architect, con-  
tractor and builder. It's a beauty.

One of the finest loads of alfalfa  
ever seen for some time stopped  
in front of the Review office last  
week end. It was from C. S. Plingle's  
farm just west of town. Although  
this alfalfa has been in stock since  
the second season crop was harvested  
it was quite green and the alfalfa  
looked as though they had been just  
freshly cut. Mr. Plingle had a fine  
old crop this year and the three cut-  
tings were in excellent condition.

## NOTICE

As you will have read in the col-  
umns of the Review the report of the  
Redcliff Retail merchants and busi-  
ness men's association, that all stores  
are going in a strictly two weeks  
cash basis, I would like to explain to  
my customers that all business done  
after December 7th must be paid for  
in full every two weeks, and if pos-  
sible, a little paid on old accounts.  
There will be no exception made to  
any particular customer. Govern  
yourself accordingly.

G. H. WORTS,  
South End Butcher.

## Increase in Price of Cess Pool Work

Owing to the increase in  
the price of feed and the  
approaching cold weather  
we have found it necessary to  
increase the price of all  
cess pool work.

In future the price will be  
\$1.50 per load  
Patrons will please take  
notice as both the under-  
signed have agreed to the  
above price.

W. H. NUSSEY  
N. E. ASSEL, Manager  
for H. Johnson

## Draying and Cess Pool Work

I have taken over the  
Draying and Teaming busi-  
ness previously conducted  
by Harry Johnson and am

## Semi- ready TAILORING

Don't shoulder  
...not too broad.  
Wide trousers...  
...not too wide. Snug hips  
...not too tight. NOT  
...that's the secret of  
Semi-ready made clothes.  
W. And, remember, not too  
expensive.
